RAL Colour Reference Guide

Common RAL Classic shades for powder-coated components

Our powder coating line applies colour to your specification rather than a fixed palette. RAL is the colour-matching standard most commonly used to specify industrial and architectural finishes. Below are commonly requested RAL Classic shades as a starting reference.

Please note: colour rendering on screen or in print varies by device and cannot be used for final colour approval. Always confirm your exact shade against a physical RAL swatch or a sample from our coating line before production.

RAL Code	Name	Swatch	Approx. Hex
RAL 9005	Jet Black		#0A0A0A
RAL 9010	Pure White		#FFFFFF
RAL 9006	White Aluminium		#A5A5A5
RAL 9007	Grey Aluminium		#8F8F8C

RAL 3020	Traffic Red		#C1121C
RAL 1003	Signal Yellow		#E5BE01
RAL 1018	Zinc Yellow		#F8F32B
RAL 2004	Pure Orange		#FF2301

RAL 8017	Chocolate Brown		#44220F

Requesting a Custom Colour

• Provide the RAL code if you have one — this is the fastest way to get an exact match.

• No RAL code? Send a physical sample or a clear photo in natural light and we'll match against the closest standard shade.

• Gloss level (matte, satin, gloss) should be specified separately from colour, as it affects both appearance and durability

Don't see a term you're looking for? Send us your drawing or specification and we're happy to walk through it with you before you submit a formal RFQ.
